

The magnetic connector that changes your lighting design.

MAG-Y is the heart of Creative Cables' new modular series. A metal element with a magnetic core, designed to be combined with extensions and cables, offering total freedom in customising any lighting system.

MAG-Y

creative
cables

The MAG-Y component, a little bit MAGnetic and a little bit MAGic allows you to design the lamp that you desire. **With MAG-Y you are the designer, the artist, the creator!**

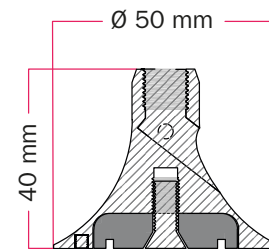

MAG-Y

The minimalist design of the MAG-Y recalls the silhouette of a 'Y', but its real magic is in how it works. Thanks to its internal magnet, lamps can be placed on any metal surface or mounted on the wall using a special metal washer, offering complete freedom in lighting design.

MAG-Y MAGNETIC SUPPORT KIT

A basic component to create any lamp of the same name, MAG-Y owes its name to the magnetic heart with its distinctive Y shape. Designed to go with most of Creative Cables' extensions and cables, this holder is a simple starting point that allows you to compose the table, floor or wall lamp that best suits your environment.

THE FREEDOM TO DESIGN WITHOUT LIMITS.

Assemble, attach, and illuminate— with a simple gesture, light shifts and adapts to your needs. Thanks to its internal magnet, it easily connects to bases, extensions, and cables, ensuring stability and limitless creative possibilities.

MAG-Y TABLE LAMP BASES

The base of the MAG-Y series is the metal accessory needed to create a table lamp, giving stability and style to the magnetic kit of the same series. A decorative element designed for bookcases, coffee tables and desks, it is available in different shapes and finishes to best suit any style or environment.
